Mudassar Hussain

AI/ML Engineer,Deep Learning, Data Science, Generative AI, MLOps, LLMs & RAG Systems, AI Agents

Lahore Punjab, Pakistan

+923051565030 **mudassarhussain6533@gmail.com** **https://www.linkedin.com/in/mudassarhussain** **https://github.com/MudassarGill**

SUMMARY

AI/ML Engineer with 1.5+ years of experience in Machine Learning, Deep Learning, Data Science, and Generative AI. Experienced in developing and deploying AI-powered applications including LLM solutions, RAG systems, AI agents, NLP pipelines, and automation workflows. Proficient in Python, TensorFlow, FastAPI, LangChain, MLOps, vector databases, and cloud-based deployment. Passionate about building scalable, production-ready AI solutions that improve efficiency and enable intelligent decision-making.

TECHNICAL SKILLS

Programming Languages: Python, C++, SQL

AI/ML Expertise: Machine Learning, Deep Learning, Data Science, Computer Vision, Natural Language Processing (NLP), MLOps, Generative AI, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), LLM Fine-Tuning, Prompt Engineering, Agentic AI Architectures, AI Agents, Autonomous AI Systems (AutoGPT, BabyAGI), Reinforcement Learning

Frameworks & Libraries: TensorFlow, PyTorch, Keras, Hugging Face, Ollama, ONNX, NVIDIA TensorRT, OpenCV, Transformers, NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, OpenCV, NLTK, FastAPI, Git, Docker, MLflow, DVC, LangChain, LangGraph, LlamaIndex, LangSmith, PEFT, n8n, AutoGen,AWS, Azure, GCP, Pinecone, Qdrant, ChromaDB, OpenAI API, Anthropic Claude API, Gemini API, PySpark, Kubernetes, GitHub Actions, Nginx, Multi-Agent Systems, API Orchestration, API Integration

Soft Skills: Leadership, Critical Thinking, Problem Solving, Communication Skills, Team Work

PROFESSIONAL EXPERIENCE

AI/ML Engineer ***Jun 2026 – Oct 2026***

LimeoX LLC ***Sargodha, Pak***

- Developed and optimized Machine Learning and Generative AI solutions for stock market intelligence, leveraging NLP, LLMs, and data-driven pipelines to improve financial data analysis and insight generation by 30%.
- Built AI-powered workflows for financial news processing and market analysis using Python, ML models, and LLM-based systems, reducing manual analysis efforts by 35% and improving automation efficiency.

Machine Learning Engineer ***April 2025 – Feb 2026***

Game Range ***Bahawalpur, Pak***

- Developed and optimized deep learning models using TensorFlow and PyTorch, achieving an 18% gain in accuracy and a 25% reduction in training time
- Built and deployed RAG-based generative AI systems with LangChain and Hugging Face, improving contextual accuracy by 25% and reducing response latency by 20%.
- Led data preprocessing, EDA, and feature selection for ML workflows, enhancing dataset integrity and increasing overall model performance by 12%.

Python Developer Intern ***Jan 2025 – april 2025***

DevCastle Bahawalpur ***Bahawalpur,Pak***

- Developed backend applications and RESTful APIs using Python and FastAPI, focusing on scalable, efficient, and maintainable software solutions
- Built automation scripts and data processing workflows, improving application performance through debugging, optimization, and clean coding practices.

EDUCATION

The Islamia University of Bahawalpur

Bachelor of Science in Artificial Intelligence |CGPA: 3.60 / 4.00

PROJECTS & PORTFOLIO

CareerPilot-AI — Multi-Agent Career Intelligence Platform *Python, PyTorch, LangChain, LangGraph, LLMs, RAG, Vector Database, FastAPI, AWS CI/CD*

- Built a multi-agent career intelligence platform using LLMs and RAG pipelines for ATS resume evaluation, skill-gap analysis, AI mock interviews, and personalized career recommendations.
- Developed automated career assessment workflows by integrating AI agents, document processing, and intelligent analysis pipelines to improve evaluation efficiency.
- Implemented scalable backend services using FastAPI and AI orchestration frameworks for real-world career intelligence applications.

NextHire AI — AI-Powered Mock Interview Platform *FastAPI, PostgreSQL, Groq LLaMA 3, Docker, AWS EC2, Nginx, GitHub Actions*

- Built an AI-powered mock interview platform using LLM-based workflows to generate role-specific questions, evaluate candidate responses, and provide intelligent feedback, improving assessment efficiency by 40%.
- Developed automated interview analysis pipelines and deployed scalable FastAPI services with Docker and AWS, reducing manual evaluation efforts by 35% and improving system response performance by 25%.

BizNova AI — Generative AI Business Intelligence Platform *Python, FastAPI, React, Gemini AI, RAG, ChromaDB, Docker, MLflow*

- Built a Generative AI business intelligence platform using RAG and LLM-based workflows to generate business insights, analyze information, and automate decision-support processes, improving response quality by 30%.
- Developed document-based retrieval pipelines using ChromaDB and Gemini AI, enhancing contextual information retrieval accuracy by 35%
- Designed scalable AI services using FastAPI, Docker, and MLflow, improving deployment efficiency and reducing manual workflow efforts by 40%.

AMFiller — Automated Machine Learning Data Preprocessing Library *Python, Scikit-learn, Pandas, NumPy, Machine Learning, Data Preprocessing,PyPI*

- Built an automated data preprocessing library to streamline missing value handling, feature transformation, encoding, and dataset preparation for machine learning workflows, reducing preprocessing time by 50%.
- Developed reusable ML preprocessing pipelines with automated data cleaning and transformation capabilities, improving workflow efficiency and enabling faster model development.

PreMLCheck — Automated Machine Learning Validation *Python, Scikit-learn, Pandas, NumPy, Machine Learning, Data Validation,PyPI,NLP*

- Built an automated data preprocessing library to streamline missing value handling, feature transformation, encoding, and dataset preparation for machine learning workflows, reducing preprocessing time by 50%.
- Developed reusable ML preprocessing pipelines with automated data cleaning and transformation capabilities, improving workflow efficiency and enabling faster model development.

AutoPX — Automated NLP Preprocessing Library *Python, NLP, NLTK, SpaCy, Text Processing, Machine Learning,PyPI*

- Built an automated NLP preprocessing library to streamline text cleaning, tokenization, normalization, and feature preparation for machine learning and NLP workflows, reducing preprocessing effort by 50%.
- Developed reusable text-processing pipelines with customizable preprocessing modules, improving NLP workflow efficiency and enabling faster model experimentation.

AI Executive Assistant —Autonomous AI Automation System *n8n, OpenAI API, Gmail API, Google Calendar API, Telegram API, FastAPI*

- Built an autonomous AI assistant using LLMs and workflow automation to manage emails, schedule meetings, handle tasks, and generate intelligent daily plans, improving productivity efficiency by 40%.
- Integrated multiple APIs including Gmail, Google Calendar, Telegram, and OpenAI models to automate real-world workflows, reducing manual task management efforts by 50%.
- Designed scalable n8n-based automation pipelines for multi-step task execution, conversational AI interactions, and intelligent workflow orchestration.
