SUMMARY

Full Stack Engineer, Software Engineer and AI/ML Engineer with 1.5+ years of experience developing scalable web applications and AI-powered products using React, Next.js, TypeScript, Python and FastAPI. Experienced with PostgreSQL and MongoDB, Generative AI solutions, RAG pipelines, AI agents and multi-agent workflows using LangChain and LangGraph. Hands-on with MLOps and production deployment using Docker, MLflow, AWS and GitHub Actions CI/CD.

TECHNICAL SKILLS

Programming Languages: Python, C++, SQL, JavaScript, TypeScript

Frontend & Full Stack Development: React.js, Next.js, TypeScript, JavaScript, Tailwind CSS, HTML5, CSS3

Backend & API Development: Python, FastAPI, RESTful APIs, API Orchestration, Nginx, PostgreSQL, MongoDB

AI/ML Expertise: Machine Learning, Deep Learning, Data Science, Computer Vision, Natural Language Processing (NLP), MLOps, Generative AI, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), LLM Fine-Tuning, Prompt Engineering, Agentic AI Architectures, AI Agents, Autonomous AI Systems (AutoGPT, BabyAGI), Reinforcement Learning

Frameworks & Libraries: TensorFlow, PyTorch, Keras, Hugging Face, Ollama, ONNX, NVIDIA TensorRT, Transformers, NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, OpenCV, NLTK,Git, Docker, MLflow, DVC, LangChain, LangGraph, LlamaIndex, LangSmith, PEFT, n8n, AutoGen, AWS, Azure, GCP, Pinecone, Qdrant, ChromaDB, OpenAI API, Anthropic Claude API, Gemini API, PySpark, Kubernetes, GitHub Actions,Multi-Agent Systems, API Integration

Soft Skills: Leadership, Critical Thinking, Problem Solving, Communication Skills, Team Work

PROFESSIONAL EXPERIENCE

AI/ML Engineer ***Jun 2026 – Oct 2026***

LimeoX LLC ***Sargodha, Pak***

- Built an AI-powered financial news intelligence system that analyzes news and predicts its impact on market behavior using NLP, LLMs and machine learning in Python.
- Developed NLP and Generative AI models for sentiment analysis, event detection and impact classification, turning unstructured news into structured market sign**.**
- Automated news collection, processing and analysis pipelines, reducing manual analysis effort by 35%.

Machine Learning Engineer ***April 2025 – Feb 2026***

Game Range ***Bahawalpur, Pak***

- Developed and optimized deep learning models in TensorFlow and PyTorch, improving accuracy by 18% and reducing training time by 25%.
- Built and deployed RAG-based generative AI systems with LangChain and Hugging Face, improving contextual accuracy by 25% and cutting response latency by 20%.
- Led data preprocessing, EDA and feature selection for ML workflows, improving dataset quality and overall model performance by 12%.

Python Engineer ***Jan 2025 – april 2025***

DevCastle Bahawalpur ***Bahawalpur,Pak***

- Developed backend applications and RESTful APIs using Python and FastAPI, focusing on scalable, efficient, and maintainable software solutions
- Built automation scripts and data processing workflows, improving application performance through debugging, optimization, and clean coding practices.

EDUCATION

The Islamia University of Bahawalpur

Bachelor of Science in Artificial Intelligence |CGPA: 3.64 / 4.00

PROJECTS & PORTFOLIO

CareerPilot-AI — Multi-Agent Career Intelligence Platform *Python, React.js, Next.js, TypeScript, Tailwind CSS, FastAPI, LangChain, LangGraph, LLMs, RAG, Vector Database, AWS, Docker, CI/CD*

- Built a full-stack multi-agent platform for ATS resume evaluation, skill-gap analysis, AI mock interviews and personalized career recommendations.
- Implemented RAG pipelines with document processing and vector search, exposed through FastAPI REST APIs, containerized with Docker and deployed on AWS.

BuyWise AI | AI-Powered E-Commerce Shopping Assistant *Next.js, React.js, TypeScript, FastAPI, PostgreSQL, LLMs, RAG, Docker, AWS*

- Built a full-stack e-commerce platform with an AI shopping assistant that uses LLMs and RAG to answer product questions and guide purchase decisions.
- Added review sentiment analysis and a personalized recommendation system, served through FastAPI APIs backed by PostgreSQL

NextHire AI | AI Mock Interview Platform *Python, React.js, Next.js, TypeScript,FastAPI, PostgreSQL, LLMs, RAG, Docker, AWS*

- Built an interview platform that generates role-specific questions, evaluates candidate answers and returns structured feedback using LLM workflows.
- Deployed FastAPI services on AWS EC2 behind Nginx with Docker and a GitHub Actions CI/CD pipeline.

BizNova AI — Generative AI Business Intelligence Platform *Python, FastAPI, React, Gemini AI, RAG, ChromaDB, Docker, MLflow*

- Built a Generative AI platform that retrieves from business documents with RAG and generates insights for decision support.
- Developed document retrieval pipelines with ChromaDB and Gemini, served through FastAPI and containerized with Docker, with experiments tracked in MLflow.

Open-Source Python Libraries | Published on PyPI *Python, Scikit-learn, Pandas, NumPy, Machine Learning, Data Preprocessing,PyPI*

- **AMFiller:** automated ML data preprocessing for missing values, encoding and feature transformation.
- **PreMLCheck:** automated dataset validation before model training, checking data quality, missing values, duplicates and class imbalance.
- **AutoPX:** automated NLP text preprocessing for cleaning, tokenization and normalization.

CERTIFICATIONS

Advance python programming – Navttc
Machine Learning Specialization - deeplearning.ai
Deep Learning Specialization - deeplearning.ai
